

Live2Phone Personal TV

version 1.0

Quick start guide

■ Installation and startup:

- Unzip and start setup.exe program for Live2Phone Server on PC.
- Start Live2Phone Personal TV Server.
- Enter Phone IMEI and registration key when requested. Allow access to the server by marking "Has access" check box.
- Tune TV channels.
- **Note:** the application will try to select the appropriate audio device. In case sound is not heard you might need to try another audio device from the "Audio Input" menu.

- Unzip and install the .sis file on the phone
- Enter registration key when requested.
- The phone is ready to connect to the server and start streaming TV.

■ Phone's keys function:

- Navigation key UP – switch to previous channel
- Navigation key DOWN – switch to next channel
- Navigation key LEFT – volume down
- Navigation key RIGHT – volume up

■ System requirements:

- Server recommended:
 - Intel® DualCore or AMD® Athlon processor personal computer.
 - TV Tuner (with high quality antenna or cable for TV reception).
 - Broadband Internet connection (256Kbps or more)

- Phone:
 - Symbian S60 3rd Edition
 - Broadband Internet connection: WiFi, 3G, a.s.o.
